BYPASSING ZONES

This function allows you to bypass one or more zones while your system is DISARMED

Enter your PIN CODE if required (programmed in by the Installer).
Then press the * key, enter the digit "2", enter the zone to be bypassed, then press #   (example to isolate zone 6)   *2 6 #
Bypassed, zones will be indicated as the LED number 6 zone light will flash slowly.
The procedures for adding a bypass and removing a bypass are the same

Bypassing zones to CK 236 alarms by alarm maintenance.com.au
